-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 August 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 and 14-30 is/are pending in the application.
- 4a) Of the above claim(s) 12 and 13 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-11 and 14-30 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.

- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

NORMAN M. WRIGHT
PRIMARY EXAMINER

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-11 and 14-30, which were rejected under 35 U.S.C. 112, second paragraph has been withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
2. Claims 1-11, 14-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art, hereinafter 'aapa'.

As per claims 1-11, 14-18, AAPA teach a digitally signed certificated having: content data, identified issuer/data handling arrangement, a certificate subject, a electronic signature/signature arrangement, a condition requiring a particular/generic subject, a particular attribute, attribute delegation, cert subject specifically identified, particular subject implicitly and explicitly identified, multiple conditions, predetermined logical relationship, both explicitly and implicitly suggested, and validity data. See aapa

figure 1-4, page 2, lines 5 et seq., page 3, lines 1-7 et seq., page 6, lines 2 et seq., page 3, lines 10-20, page 4, line 1-3, and page 6, line 27 et seq. AAPA teaches that certificate content for a particular subject may be inferred or explicitly transferred between particular subjects, which have a predetermined logical relationship see the background of the invention. Moreover the relationship may be implied or explicitly as taught at aapa pages 2-4 et seq. A condition in aapa is that the particular party must be able to respond to the challenge –response transaction by knowing the key pair used to encrypt the data. Not explicitly taught is the certificate being stored in a memory.

It is inherent that the SPKI certificate of figures 1-4 are stored in a computer readable memory because, computer systems that utilized electronic certificates must buffer the certificates before they can be utilized in a computer system. This is the convention in the data processing arts; moreover, the use of computer readable memories are utilized in data processing systems for holding data and programs that the computer system needs to accomplish its programming.

Similarly claims 19-30, use the terms reduction/trust discovery engine, trust chain verifier/builder, and trust chain branch control are defined in the disclosure as a means of proving a trust relationship, via branches or trust chains being built from justifying certificates. Utilizing the delegated rules and names to establish such relationships, either from a known trusted chain or at the end of the trusted chain, see disclosure page 9 et seq.. In this instant the engine general-purpose compute is utilized to effect the verification and authorization of trusted chain links, more particularly the certificate content management of trust from one link to another, page 11, lines 1-5 et seq..

Art Unit: 2134

Additionally, the process functions the same regardless of what the engine or computer and its associated routines are labeled.

Response to Arguments

3. Applicant's arguments filed 8/12/05 have been fully considered but they are not persuasive. Arguments are drawn to generalize attributes having specific meaning within the claims; however, the claims do not specifically recite said features.

Therefore, it is moot whether or not the prior art has such features.

1. This is a continuation of applicant's earlier Application No. 09732948. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Norman M. Wright whose telephone number is (571) 272-3844. The examiner can normally be reached on weekdays, from 8AM to 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Morse can be reached on (571) 272-3838. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
